RACING

ON THE ROAD

# DS PERFORMANCE FEATURES

- Track level friction for reduced stopping distance
- Excellent performance in all conditions (hot/cold/wet/dry)
- Low disc wear
- Thermal underlayer eliminates fluid boil
- Extensive range

**R90 APPROVED**

## THE DS PERFORMANCE RANGE

- over 210 pad shapes
- over 7000 applications
- pad look following OE and Racing specification (black paint – red marking)
- improved disc and pad wear performance drawn from race experience with high performance compounds

**"BORN FROM RACING EXPERIENCE"**

**THE FIRST NAME IN BRAKES**

# TECHNICAL HIGHLIGHTS

### R90 APPROVAL FOR EU ROAD USE

All parts in the catalogue for European road use are R90 approved where required by law. (Models in production from 1999 onwards).  
The R90 number is marked on pads and packaging.

### DS Performance

### SCORCHING

This operation is performed on all of the DS PF range. Scorching consists of "burning" the surface of the pad. This significantly reduces the bedding-in time when pads are fitted onto the vehicle.

### THERMAL UNDER-LAYER

- Applied to the entire DS PF range
- Thin layer of specific mix pressed between the backplate and the friction material
- Ensures perfect pad/plate bind
- Works as thermal barrier preventing heat transfer through the caliper to the brake fluid

### LIMITED DISC WEAR

Many high performance materials are too aggressive and can cause excessive disc wear. DS PF is formulated to give minimal disc wear for a high performance product.

### REFINEMENT

DS Performance has been developed to deliver great comfort, combining passenger car refinement with pedigree performance.

### EXCELLENT PERFORMANCE

With a  $\mu$  of 0.55+ DS PF pads deliver a superb performance both hot and cold. Excellent wet recovery properties, great resistance to fade and consistent pedal feel complete all the requirements for a safe, reliable and efficient high performance brake pad

# CATALOGUE NOMENCLATURE

## FDS → OE/OEM equivalent (R90 approved)

- Part numbers have an equivalent OEM pad, which is identified with the prefix "FDB" in the Ferodo After-market range
- Part numbers have **R90 approval** for European road use if required (models in production 1999 onwards)

## FDSR → Upgrade Kits (No R90)

- Part numbers have a RACING-only equivalent pad, which is identified with the prefix "FRP" in the Ferodo Racing range
- Or are pads fitting into upgrade kits of brake system manufacturers (BSM)
- Part numbers require **no R90 approval** for road use since the brake system is not fitted as standard on production models

## FDSE → Outside EU (No R90)

- Part numbers are specific to the US and Asia-Pacific market
- Part numbers require **no R90 approval** for road use since they are for use outside the European Community

★ → this symbol identifies all applications in this catalogue for which the proposed part number will fit the specified vehicle, but may be different in some minor details to the bespoke OE pad -in almost all cases these differences are in thickness or wear Indicator type (or absence thereof). Thickness will never exceed that of the OE base pad and will be no more than 2mm thinner.

# TECHNISCHE GLANZPUNKTE

## R90-GENEHMIGUNG FÜR EU-STRAßENNUTZUNG

Alle Teile im Katalog für europäische Straßennutzung sind R90-genehmigt, wenn dies gesetzlich erforderlich ist. (Europäische Modelle in Produktion ab 1999)

Die zugeordnete R90-Nummer ist auf den Belägen und der Verpackung angegeben.

### DS Performance

## VERSENGEN

Dieser Vorgang wird am gesamten DS PF-Sortiment ausgeführt. Versengen bedeutet das "Verbrennen" der Oberfläche des Belags. Dies reduziert die Einbauzeit erheblich, wenn die Beläge im Fahrzeug angebracht werden

## THERMISCHE UNTERLAGE

- Beim gesamten DS PF-Sortiment angewendet.
- Dünne Schicht einer spezifischen Mischung, die zwischen die Rückplatte und das Reibungsmaterial gepresst wird.
- Sorgt für perfekte Belag-/Plattenbindung
- Wirkt als thermische Barriere zur Vermeidung von Wärmeübertragung durch den Bremssattel zur Bremsscheibe.

## INGESCHRÄNKTER SCHEIBENVERSCHEIß

Viele Hochleistungsmaterialien sind zu aggressiv und können übermäßigen Scheibenverschleiß verursachen. DS PF ist so gestaltet, dass ein minimaler Scheibenverschleiß für ein Hochleistungsprodukt erzielt wird

## VEREDELUNG

DS Performance wurde entwickelt, um hohen Komfort zu bieten, wobei die Veredelung von Personenkraftwagen mit reinrassiger Leistung kombiniert wird.

## HERVORRAGENDE LEISTUNG

Mit einem  $\mu$  von 0,55+ bieten DS PF-Beläge eine großartige Leistung, sowohl heiß als auch kalt. Ausgezeichnete Eigenschaften zur Wiederherstellung nach Nässe, hervorragende Nachlassungsbeständigkeit und konsistente Pedalgriffigkeit erfüllen alle Anforderungen für einen sicheren, zuverlässigen und effizienten Hochleistungsbremsbelag.

# KATALOG NOMENKLATUR

## FDS → OE/OEM äquivalent (R90-genehmigt)

- Teilenummern haben einen äquivalenten OEM-Belag, der mit der Vorsilbe "FDB" im Ferodo-Ersatzteilmarktsortiment gekennzeichnet ist.
- Teilenummern haben eine **R90-Genehmigung** für europäische Straßennutzung, falls erforderlich (Modell in Produktion ab 1999).

## FDSR → Upgrade-Sets (Ohne R90)

- Teilenummern haben einen RACING-only äquivalenten Belag, der mit der Vorsilbe "FRP" im Ferodo-Ersatzteilmarktsortiment gekennzeichnet ist,
- Oder sind Beläge, die zu Upgrade-Sets oder Bremssystemherstellern (BSM) passen.
- Teilenummern erfordern **keine R90-Genehmigung** für die Straßennutzung, da das Bremssystem nicht standardmäßig bei Produktionsmodellen eingebaut wird.

## FDSE → Außerhalb der EU (Ohne R90)

- Teilenummern sind spezifisch für die USA und Asien-Pazifik.
- Teilenummern erfordern **keine R90-Genehmigung** für die Straßennutzung, da sie zur Verwendung außerhalb der Europäischen Gemeinschaft bestimmt sind.

★ → Dieses Symbol kennzeichnet alle Anwendungen in diesem Katalog, für die die vorgeschlagene Teilenummer zum spezifizierten Fahrzeug passt, können jedoch in einigen geringfügigen Details unterschiedlich zum maßgeschneiderten OE-Belag sein - in nahezu allen Fällen treten diese Differenzen im Hinblick auf Dicke oder Verschleißanzeigart (oder das Fehlen davon) auf. Die Dicke wird niemals jene des OE-Basisbelags überschreiten und wird nicht mehr als 2 mm dünner sein.

# CARACTÉRISTIQUES TECHNIQUES

EN  
DE  
FR  
IT  
SP

### HOMOLOGUÉ R90 POUR UTILISATION STRADALE

Toutes les plaquettes du catalogue sont homologuées R90 lorsque requis par la loi (modèles produits depuis 1999 utilisés dans la Communauté Européenne)

Le code d'homologation est précisé sur les plaquettes et sur l'emballage

### DS Performance

### RAFFINEMENT

La gamme DS Performance a été développée pour offrir un confort de conduite associé à une grande capacité de freinage.

### SCORCHING

Le scorching consiste à "brûler" la surface de freinage de la plaquette. Il réduit très sensiblement le temps de rôdage lorsque les plaquettes sont montées sur le véhicule.

### ISOLANT THERMIQUE

- Disponible sur toute la gamme DS Performance
- Fine couche d'isolant pressée entre le support métallique et le matériau de friction
- Assure un collage parfait du matériau de friction sur le support métallique
- Barrière thermique prévenant le transfert de chaleur vers l'étrier et le liquide de frein.

### USURE DU DISQUE

La majorité des plaquettes haute performance sont trop agressives au freinage et peuvent causer une usure prématurée des disques de frein. Le matériau de freinage du DS PF est spécialement conçu pour permettre un minimum d'usure des disques pour un matériau de haute performance.

### PERFORMANCES

Grâce à son coefficient de friction supérieur à 0.55, la plaquette DS PF offre des performances exceptionnelles, quelles que soient les conditions atmosphériques. Son excellente propriété de freinage par temps de pluie, sa grande résistance au "fading" (diminution de la puissance de freinage) et sa sensation constante au niveau de la pédale complètent le panel des exigences d'une plaquette de frein de haute performance sûre, fiable et efficace.

# LEGENDES DU CATALOGUE

## FDS → équivalent à la plaquette d'origine (homologué R90)

- Les références FDS ont un équivalent dans le marché de remplacement (OEM) qui, dans la gamme Ferodo Aftermarket, est identifié par le préfixe "FDB"
- Les références sont, si exigées par la loi, **homologuées R90** pour utilisation sur routes Européennes (modèles produits depuis 1999)

## FDSR → Kits d'évolution (Pas de R90)

- Les références FDSR ont uniquement une équivalence RACING, qui est identifiée par le préfixe "FRP" dans la gamme Ferodo Racing
- Ce sont aussi des plaquettes vendues dans les kits d'évolution des fabricants de systèmes de freins (BSM) Ces références **n'exigent pas l'homologation R90** pour utilisation sur routes Européennes étant donné que le système de frein n'est pas monté d'origine sur les véhicules de production.

## FDSE → En dehors de l'Europe (Pas de R90)

- Les références sont spécifiques aux marchés Américains ainsi que ceux de l'Asie-Pacifique
- Ces plaquettes **n'exigent pas l'homologation R90** pour utilisation sur routes Européennes car elles sont uniquement destinées à une utilisation en dehors de la Communauté Européenne.

★ → Ce symbole identifie toutes les applications du catalogue pour lesquelles la référence proposée est applicable à un véhicule spécifique, mais dont certains petits détails peuvent être différents de la plaquette d'origine.

Dans la plupart des cas, ces différences se rapportent à l'épaisseur ou à la présence d'un tépoin d'usure (ou son absence). Les plaquettes ne seront jamais plus épaisses que celles d'origine ni ne seront jamais plus de 2mm plus fines.

# CARATTERISTICHE TECNICHE

## OMOLOGAZIONE R90 PER USO STRADALE

Tutte le pastiglie di questo catalogo commercializzate per uso stradale all'interno dei territori dell'Unione Europea hanno l'omologazione R90 se richiesta dalla normativa vigente.

(modelli Europei in produzione a partire dal 1999)

Il numero R90 assegnato al prodotto è riportato sulla pastiglia stessa e sulla confezione.

### DS Performance

## SCORCHING

Questa operazione, effettuata su tutte le pastiglie DS PF, consiste in una cottura superficiale del materiale d'attrito. Ciò riduce significativamente i tempi di rodaggio della pastiglia, migliorandone le prestazioni e il funzionamento fin dalle prime fasi di utilizzo.

## ISOLANTE TERMICO

- Applicato a tutta la gamma DS PF
- Fine strato di uno specifico mix di sostanze pressato tra il supporto metallico e il materiale d'attrito
- Migliora la resistenza meccanica evitando distacchi
- Opera come barriera termica prevenendo il trasferimento di calore dalla pastiglia all'impianto frenante

## LIMITATO CONSUMO DEI DISCHI

Molti materiali "high performance" sono noti per la loro aggressività sui dischi con conseguenti e indesiderati consumi. Il DS Performance è un materiale che pur avendo un elevato livello di attrito e performance, garantisce un limitato consumo dei dischi.

## COMFORT

DS Performance è stato sviluppato per fornire grande confort di utilizzo, proponendo al mercato un prodotto "high performance" con caratteristiche analoghe a quelle di un prodotto in primo equipaggiamento.

## EXCELLENT PERFORMANCE

Con un  $\mu$  superiore a 0,55, le pastiglie DS PF forniscono eccellenti performance ad alte e basse temperature. Un'eccellente efficacia in condizioni di bagnato, stabilità delle prestazioni e ottima risposta al pedale rendono queste pastiglie un sicuro, affidabile ed efficiente prodotto high performance.

# NOMENCLATURA CATALOGO

## FDS → OE/OEM equivalente (Omologazione R90)

- Codici con un equivalente tra le pastiglie di ricambio originale, identificate con il prefisso "FDB" nel catalogo Ferodo Aftermarket.
- Codici che hanno **omologazione R90** per uso stradale se richiesto dalla normative vigente (modelli in produzione a partire dal 1999).

## FDSR → Upgrade Kits (No R90)

- Codici con un equivalente tra le pastiglie destinate esclusivamente ad impianti da competizione, identificate con il prefisso "FRP" nel catalogo Ferodo Racing.
- Codici che non richiedono **omologazione R90** per uso stradale poiché l'impianto frenante al quale sono destinate non è montato come impianto standard su un particolare veicolo stradale.

## FDSE → Fuori EU (No R90)

- Codici destinati a veicoli comuni in Usa, Asia e Australia
- Codici che **non richiedono omologazione R90** per uso stradale poiché destinati ad un utilizzo al di fuori della comunità Europea.

★ → Questo simbolo identifica tutte quelle applicazioni del presente catalogo, per le quali il codice proposto potrà essere montato sul modello di autoveicolo indicato ma potrebbe risultare differente in qualche minimo dettaglio rispetto al corrispondente codice originale.

In quasi tutti i casi, queste differenze riguardano lo spessore totale della pastiglia o l'indicatore di usura (tipologia, assenza o inutilizzabilità di quello presente). Lo spessore non sarà mai maggiore di quello della pastiglia OE, nè inferiore per più di 2 mm.

# ASPECTOS TÉCNICOS

## HOMOLOGADAS EN ECE-R90 PARA EL USO DE CARRETERA

Todas las referencias del catálogo, cuentan con la homologación ECE-R90 según la solicitud del reglamento Europeo.

(para modelos producidos a partir de 1999)

El número identificativo ECE-R90 se encuentra visible en el marcaje tanto en el estuche de las pastillas, como en el reverso de la propia pastilla.

### DS Performance

### CAUTERIZADO

Este proceso térmico se realiza en todas las pastillas de la gama DS Performance. El cauterizado consiste en un proceso de "abrasión" superficial. Ello reduce significativamente el periodo de adaptación al disco de las pastillas instaladas.

### SUBCAPA TÉCNICA

- Disponible en toda la gama DSPF
- Delgada capa de material de una específica formulación, situada entre el soporte metálico y el propio material de fricción
- Asegura una perfecta sujeción entre el material de fricción y el soporte
- Su función consiste en: crear una barrera térmica, en prevención de la transferencia de temperatura a través de la pinza, hasta el líquido de frenos.

### MÍNIMO DESGASTE DEL DISCO

La mayoría de los materiales de altas prestaciones, son muy agresivos y provocan un desgaste prematuro al disco. DS PF esta formulada de manera que aporta las maximas prestaciones con el minimo nivel di agresión al disco.

## COMFORT

La gama DS Performance ha sido desarrollada para aportar un elevado nivel de confort al usuario, combinando a la perfección con las elevadas prestaciones de la gama.

## SUPERIORES PRESTACIONES

Con un coeficiente de fricción superior a  $\mu 0,55$  DSPF cuenta con un comportamiento excelente tanto en elevados niveles térmicos, como en frío.

Excelente capacidad de recuperación en situaciones de humedad, elevada resistencia al fading y consistente tacto pedal, todo ello aporta, a los elevados requerimientos, seguridad y confianza con el máximo nivel prestacional.

# MANUAL DE CODIFICACIÓN

## FDS → OE/OEM equivalente (homologada ECE-R90)

- Referencias con el equivalente de las pastillas OEM, identificación con el prefijo "FDB" para la gama de Ferodo aftermarket.
- Referencias con **homologación ECE-R90** requerida para el mercado Europeo (para vehículos en producción desde 1999).

## FDSR → Kits Prestacionales (No ECE-R90)

- Referencias con sus equivalencias racing únicamente identificadas con el prefijo "FRP" en la gama de pastillas de Ferodo Racing.
- O son Pastillas instaladas en los kits prestacionales de los sistemas de frenos utilizados por los constructores (BSM)
- Estas referencias **no requieren la homologación ECE-R90** para su uso en carretera, siempre que el sistema haya sido instalado en origen.

## FDSE → Fuera de la EU (No ECE-R90)

- Referencias específicas para los mercados Americano y Asia Pacifico.
- Las referencias, **no necesitan contar con la homologación ECE-R90** fuera del territorio Europeo.

★ → este símbolo identifica las referencias en el catálogo, para las aplicaciones especiales, con unas mínimas modificaciones pero adaptándose a las pastillas OE, en la mayoría de ocasiones las diferencias son relativas a espesor de pastilla, tipo de indicador de desgaste (o la ausencia de este).

El espesor de la pastilla nunca deberá superar la dimensión de las cotas de OE y nunca deberá ser inferior a 2mm de espesor.
